Overview

The Cisco Power Cube 3 allows users to power their compatible Cisco IP phone when Power over Ethernet (PoE) is not available on their network. Cisco CP-PWR-CUBE-3 is compatible with virtually every phone Cisco makes except for the wireless IP phone, such as CP-792x and some older conference phones such as CP-7935, CP-7936.

The first and second generation are not compatible with the newer versions of the 7900 series phones which is why the CUBE-3 is recommended.

Quick Specification

Figure 1 shows the appearance of CP-PWR-CUBE-3.
